YAHSHUA'S WITNESS MAGAZINE

Declaring a new and living way. (Heb. 10:20)

Creation vs. Evolution p. 4.

*A publication of Yahweh's Evangelical Assembly
A branch of the Messianic Assemblies of Yahweh 7th day, Nairobi,
Kenya*

Yahshua's Witness Magazine

is dedicated to His bride. Yahshua will be returning soon to receive His own unto Himself (Jn. 14:3). His bride must make herself ready (Rev. 19:7). A person who is called out of this world by the Father, who repents of his/her sins, is baptized in the name of Yahshua the Messiah (Acts 2:38), the only name under heaven given among men, whereby we must be saved (Acts 4:12), and receives the Holy Spirit must come to know Him as the Scriptures declare and witness of Him (Jn. 5:39-47). Peter encouraged, "But grow in grace, and the knowledge of our Sovereign and Saviour Yahshua the Messiah," 2 Pet. 3:18. We will, with Yahweh's help and the Spirit of Truth, seek to reveal a most wondrous Savior and Redeemer, a Savior and Redeemer that much of the world has spoken of, dreamed of, hoped for, but truly never known. While much of the world looks to a savior, the savior of whom they have been taught has become corrupted. Another has been substituted in the true Savior's place. Those who are called out of this world and given to Him are likened unto virgins. But in accordance with His own parable of those virgins, only five are wise while the other five are foolish. The five wise are able to enter into the planned marriage with the Messiah, but the five foolish have the door closed to them (Mt. 25:1-13). Let's be wise, remember our betrothal to the Messiah and the virginity to which He has restored us (2 Cor. 11:1-2), resist the wiles of the devil and look to and prepare for a joyous and glorious marriage that will endure for all eternity. HalleluYah!!!!

OUR COVER: Since our focus on this issue is creation vs. evolution, we thought that this picture of a heavenly nebula would be an awesome picture to utilize for our cover. The heavens are mysteriously beautiful with many wonders to reveal in the coming ages. This is what we believe. We do hope that you enjoy our focus on the battle that few are waging, that is creation vs. evolution. Our stand is for Yahweh and Yahshua and the wonders that they have brought forth. The battle is great. The enemies are seemingly prepared and well armed, but the victory always belongs to Yahweh. HalleluYah!!!!

OUR AWESOME CREATOR!

There is so much confusion in this present evil world! No wonder its called Babylon! If you listen to the scientists, the teachers, the leaders, the psychologists of this world, then you will be greatly confused indeed! Why? Because they have the mind of man, the mind of the first man Adam, but they don't have the Spirit of Yahweh the Creator, which is also the mind of the second Adam.

Yahweh begins His instruction book with the first five books of Moses called the Torah. The very first letter of the Torah is the *beit* (ב, equivalent to our English "b"). The last letter of the Torah is *lamed* (ל, equivalent to the English "l"). What the Torah reveals and teaches is the things that should be on our hearts, which is *leb* (לב) in Hebrew. Notice that the Hebrew word for heart consists of the same two letters *lamed* and *beit* (remember that Hebrew reads from right to left).

He wants His commandments, His statutes, His judgments to be on our hearts (לב) because they teach us how to love Him, and how to love our neighbor. They establish the paths of righteous, love, morality, etc.

However, if we reverse the two Hebrew letters, then we obtain the word *bel* (בל). Remember that Bel was one of the chief deities of Babylon who was equivalent to the Canaanite Ba'al. This would mean that if our hearts are focused on the Torah, then it will work on our hearts teaching us the valuable things of life. It will give us the true sense of direction. But if our hearts are elsewhere, then our worship changes from Yahweh to Bel/Ba'al. As a matter of fact, Babylon/Babel is בבל in Hebrew.

Generally, when the *beit* precedes a Hebrew word it gives the sense of being "in" something. Take, for instance, the very first word of the Scriptures which is *bereshiyth*. The Hebrew looks like this: בראיית. The *beit* (ב) at the beginning of this word gives us the idea of the English word "in."

Since Babylon/Babel (בבל) means confusion, the added *beit* (ב) would give us the short phrase "in Bel," or "in Ba'al." This is exactly what Babylon does. She leads the people of the earth to worship another elohim rather than the true Elohim of heaven and earth whose name is Yahweh. This is exactly what Revelation 17 and 18 are proclaiming. This woman riding on a great beast is holding a cup of mixed wine that is intoxicating all people of the earth leading them to commit fornication. Notice that the beast, the woman, the kings of the earth, and the merchants of the earth are all complicit in this confusion (Rev. 17:1-6; 18:1-3).

Just to clarify a little more, the Canaanite word Ba'al, a derivative of the Babylonian Bel, means "lord." Yahweh's name is the revelation of who He is. Just as your name is the revelation of who you are. His name is supposed to appear about 7,000 times in the Old Testament alone, but is replaced with "the LORD," or "GOD," etc.

The word for name in Hebrew is *shem* (שם). The *shin* (ש) is a picture of teeth. This is more clearly seen in the more ancient Pictorial Hebrew (𐤑). With teeth we eat, consume, destroy, etc. The *mem* (ם) is a picture of water, also more clearly seen and understood in the more ancient Pictorial Hebrew (𐤌). Water is certainly necessary for life, but can also become chaotic, and confusion when it exists in large bodies like seas, rivers, lakes, etc. Therefore, the Hebrew word for name (שם/𐤑𐤌) has to do with the destruction (𐤑) of chaos (𐤌). Thus, you don't know who someone really is, you are in chaos and confusion as to who they are until you know their name. You don't know the true Creator until you have or know His true name. You don't know the true Savior until you have or know His true name. As long as you continue in the false names, and false religious system, you are serving Bel/Ba'al (בל), and the confusion (בבל) of Babylon (בבל).

The word Torah also means "law." The Torah also contains the righteous law of Yahweh. The creation exists according to physical laws that govern it. Man understands that he must establish laws in order to seek to control society. Generally, the right laws bring peace and orderliness. Without those laws, there is nothing but anarchy.

If there are laws given to govern the creation e.g. the laws of physics, chemistry, biology, thermodynamics, etc., and men's laws to govern society, so that there can be peace and rest, then what about Yahweh's spiritual law, specifically and especially the ten commandments? Those are given so that we can find peace and rest with our Creator, but today's world denies that they are still in effect, in other words, "the law is done away." But the law describes what sin is, and sin is the transgression of the law (1 Jn. 3:4). If there is no law, there would be no sin.

This leads to other conclusions, there can be no law without a lawgiver, or lawmaker. There can be no creation without a Creator. The fact that creation exists is proof that there is a great, all wise, extremely intelligent, awesome Creator. The fact that physical law exists is proof that there is a great, all wise, extremely intelligent, awesome Lawgiver.

(Continued on page 22)

CREATION VS. EVOLUTION

I was a member of a "Creation forum" to which I had to pay a great deal of attention. My attention was drawn to the forum when one of the members posted a remark that evolutionists are intolerant. It seems that Patrick Henry College, a Christian college that was established to serve home school graduates, had been denied accreditation by the national group of colleges because of their stand on creationism. At issue is the school's Statement of Biblical Worldview, in which professors agree that all courses will be taught with the understanding that [Elohim] created the world in six 24-hour days. In a letter, academy President Jeffrey D. Wallin told Patrick Henry that the statement conflicts with the requirement that "liberty of thought and freedom of speech are supported and protected, bound only by such rules of civility and order as to facilitate intellectual inquiry and the search for truth."

By Jerry Healan

Now isn't it amazing that if one focuses on creationism and/or teaches it in their schools, it is regarded as being against liberty of thought and freedom of speech, intellectual inquiry and even the truth! Of course, if schools ban creationism (which the great overall preponderance do) it isn't considered to be against liberty of thought, freedom of speech, intellectual inquiry and truth.

ENTER AN EVOLUTIONIST

One man posted this comment: "It is not a matter of academic freedom, it's a matter of teaching the facts. Religious creation myths belong in the classroom of Comparative Religions 101 and not in the science department. There is a vast distance between the academic and the religious. Schools and universities are not churches."

Again, he posted, "**Intelligent design**" (if that means **"evolution is correct but God did it"**), is not provable. The elements of biological evolution ARE provable. There is no such thing as "data" or "basic understanding" of "creation" and "creation" is NOT a scientific theory. It has nothing to do with the interests of science

since it is NOT science. Despite the futile attempts of the ICR to present information couched in the language of science, creationism is a religious belief system based on bronze age myths. There is no "data" to give science students about non-existent global floods or talking snakes in fruit trees in a legitimate educational institution other than to say "the

Most college students cannot tell you where Lithuania is and think Plato is Mickey

bible says so."

"I am no more opposed to anyone who wants to believe the Genesis account as "fact" any more than I am opposed to those who want to believe the moon is made out of green cheese, the earth is flat, Elvis is alive and kidnapped by UFOs or that the earth is the center of the universe. I am only opposed to attempts to invade the classrooms with these beliefs. America is shamefully and humiliatingly behind Japan and European

countries in education as it is, particularly in science and mathematics. Most college students cannot tell you where Lithuania is and think Plato is Mickey Mouse's dog. The tragic state of American primary and secondary education is a direct result of the influence on school boards by the religious right as well as the lack of interest and funding of education by the political right."

"At the end of the day, however, "creationism" is a religious principle that has no role in publicly funded education and will never get past the Supreme Court unless the political right is successful in its long battle to deconstruct the Constitution or at least unravel the 1st amendment."

My reply: Well, these statements, and many, many more caused me to get involved with this man who, I must admit, is much more highly educated than I am. However, as we know, if Yahweh is with us, who can be against us? Even though this man is of much higher intelligence than I am, there is no comparison between the intelligence that Yahweh possesses and what this man possesses. Therefore, how can I fear him? What if he

makes me look like a fool? Isn't it better to be a fool for Yahweh and His purposes than to take up the tomfoolery of the world's wisdom?

He decries the fact that America is shamefully and humiliatingly behind Japan and the European nations in education, but when we had the supremacy over them, we did believe in a Creator, and prayer and Scriptural beliefs, including creationism, were allowed in the schools.

Could it be that the reason that we are lagging behind is because we have thrown our Creator and the power of His marvelous works out the window? And a man like this works fervently to keep it that way!?

THEORY

Here is what this man posted concerning the word "theory": "Let me explain that the scientific definition of a THEORY is not the same as the colloquial use of the word that most people think is "guesswork." A THEORY in science is an explanation that fits ALL of the known proven, verified, tested and testable FACTS of an issue. ALL of the elements of the Theory of Evolution are FACTS that have been proven just as ALL of the elements of the Theory of Relativity are proven FACTS...just ask anyone who was in Hiroshima 56 years ago."

My reply: The word "theory" means contemplation or a speculative idea or plan as to how something might be done. When one looks up the word "speculative" he finds out that it means "uncertain, risky." This would be the colloquial use of the word to the general

population.

However, as JK (we'll call him this for identification purposes only, we will leave his true name out of the picture) says, the word "theory" implies considerable evidence in support of a formulated general principle explaining the operation of certain phenomena. This would be the meaning of the word "theory" as applied to science."

Now, I must admit that I don't get into the in-depth scientific research and books, as this man does. While I do love (true) science and much of its data, I simply don't read the supposed intricate detailed works of the world's science books. I'm probably more like everyone else, I read a lot of my science out of *Time Magazine* or some other journalistic publication.

But the articles are still quite revealing in their nature concerning the words of the scientists and the attempts of the

Isn't it better to be a fool for Yahweh and His purposes than to take up the tomfoolery of the world's wisdom?

scientific and journalistic world to pawn off their "theory" to the general population.

AN EVOLUTIONARY ARTICLE

For instance, *Time Magazine* ran an article in the July 23, 2001 edition entitled "One Giant Step for Mankind" and the caption under the title read "Meet your newfound ancestor, a chimp like forest creature that stood up and walked 5.8 million years ago." When I saw

the magazine on display, I knew that I had to have it because the magazine cover depicted the face of an ape (named *Ardipithecus ramidus kadabba*) with huge captioned letters "HOW APES BECAME HUMAN."

When one reads the article, he learns that it is presented as factual. Science has definitely found a missing link to the evolutionary staircase. There is no other conclusion. Science has the facts and the facts support the "Theory of Evolution."

But reading the article closely, one finds the first statement of the second paragraph, "And it was here too that nature indulged in what was perhaps her greatest evolutionary experiment." PERHAPS?!!! NATURE DID IT?!!!

Here are the last two sentences of that same paragraph, "But while it wouldn't happen until millions of years in the future, this new primate's evolutionary descendants would eventually develop a large, complex brain. And from that would spring all of civilization, from Mesopotamia to Mozart to *Who Wants to be a Millionaire*."

What a great leap! No wonder the caption under the title spoke of "One Giant Step for Mankind!" In one paragraph composed of five sentences the author goes from "perhaps" to a definite, emphatic statement. Isn't this what our scientists do?

After reading the article several times with a highlighter and a pen for underlining purposes, I discovered the truth concerning the emphasis that scientists put on their scientific "facts" and their use of the

word “theory.” The word “probably” was utilized five times, “almost certainly” once, “what appears to be” once, “may well have been” once, “somehow” once, “suspects” once, “mystery” once, “presumably” once, and “maybe” twice. Doesn’t this show that the scientific use of the word “Theory” is really and truly the same as the colloquial use, but they are just too blind and arrogant to admit it?

OTHER PROBLEMS

The article says, “Haile-Selassie and his colleagues haven’t collected enough bones yet to reconstruct with great precision what *kadabba* looked like.” Yet, the artistic depictions of this supposed ape-like, hominid creature make it look like a very stately, tall creature that has the characteristics of both ape and human.

While stating that the creature was more chimp like in stature and size, they state, “But unlike the chimp or any of the other modern apes that amble along on four limbs, *kadabba* **almost certainly** walked upright much of the time.” Then in the next paragraph they say, “Exactly how this hominid walked is still **something of a mystery**, though with a different skeletal structure, its gait would have been unlike ours.”

Does “almost certainly” convey fact or does it only speculate? If how they walked is still “something of a mystery” does that convey fact or does it only speculate?

Interestingly, this statement is made, “But armed with knowledge about our ancestor’s physical attributes and the environment that surrounded them, scientists have come up

with **several theories.**” SEVERAL THEORIES?!!! My, my, my, it sounds as if there **PROBABLY** are about as many theories about this creature as there are scientists. It sounds like several scientists have taken the same basic “FACTS” and have interpreted them differently.

DISAGREEMENT IN THE CAMP

One Paleontologist presented this scenario, “If you’re moving into more open country with grasslands and bushes and things like this, and eating a lot of fruits and berries coming **off low bushes**, there is a hell of an advantage to be able to reach higher. That’s why the gerenuk [a type of antelope] evolved its long neck and stands on its hind legs, and why the giraffe evolved its long neck. There’s strong pressure to be able to reach a wider range of levels.”

***My, my, my, it
sounds as if there
PROBABLY are
about as many theo-
ries about this crea-
ture as there are***

A giraffe needs a long neck to eat off of low bushes? A gerenuk needs a long neck and to be able to stand on two legs to eat off of low bushes? Just how low were those bushes? And why didn’t man evolve to be much taller and stronger with a longer neck and arms and legs so he could compete with creatures like the giraffe and the gerenuk? Besides, why didn’t the giraffe or the gerenuk just evolve into apes and mon-

keys and then they could climb up to the higher places if they needed to stretch for their food? The statement made by this certain paleontologist wasn’t the brightest of statements, but then she is the scientist and scientists can get away with silliness because, after all, they are the higher educated. They are the ones who are able to take all of the facts and make brilliant conjectures, speculations and theories based on those facts, and no matter if they all disagree with each other and they all have their own idea or theory different from the other scientists, but based on the same facts; it just isn’t kosher to allow someone who hasn’t been taught at the feet of the world’s college and university professors to have any say in the matter. Especially, if we lesser species of the human race believe in something as mythical as the Holy Scriptures.

Other scientists disagree with the deductions of Mr. Selassie concerning his supposed important find. It is stated, “But not everyone buys the story. Indeed, the French and Kenyan team that presented a 6 million-year-old fossil last December insists that theirs, known as *Orrorin tugenensis* (or, more familiarly, Millennium Man because it was announced in 2000), is the true human ancestor and that *Ardipithecus* is nothing more than a monkey’s uncle—or a chimp’s great-great-grandfather, anyway. They even dismiss Lucy and her close kin, about as firmly entrenched in the human lineage as you can get, as evolutionary dead ends that left no living descendants.”

Of course, once again, only scientists are allowed to disagree

and denounce the veracity of the findings and even reveal the real truth of the matter. It is taboo to allow a non-scientist to look at the various statements concerning the evolutionist's pet ideas and speak ill of it.

What the scientists are struggling for, but, of course, don't want this truth to come out, is they are competing for the distinctive honor of making some great discovery in order to be awarded a Nobel Prize. Therefore, there will be, and has been, a lot of in-fighting as has been revealed here. But this in-fighting between them will help to reveal the real truth. There will be charge and counter charge, each desiring to exalt his own personal find and idea over the other and if the public will just learn to read between the lines and pay heed to the statements made, they will learn the truth of the matter.

NATURAL SELECTION

Evolution teaches that everything evolved through "natural selection." but let's look at some statements made about this subject creature, "And while the ability to walk on two legs **probably** started out as an increasingly frequent behavior, evolution demands an explanation for why it persisted. On first blush, **bipedalism just doesn't make much sense.** For our earliest ancestors, it would have been slower than walking on all fours, while requiring the same amount of energy. Says Lovejoy bluntly: **It's unnatural. It's bizarre.**"

UNNATURAL?!!! BIZARRE?!!! But I thought that evolution comes about through NATURAL SELECTION, not something that is UNNATURAL and BIZARRE! Isn't it interesting

that the scientists can step out of their own realm of natural selection and declare something to be unnatural once in awhile, and still teach the idea of NATURAL SELECTION?!

The article goes on to say, "Yet the advantages of walking upright were **somehow** so great that the behavior endured through thousands of generations. Indeed, the anatomy of our ancestors underwent all sorts of basic changes to accommodate this new way of moving. Many of the changes help the body stay balanced by stabilizing the weight-bearing leg and keeping the upper torso centered over the feet. Lovejoy, who studies the anatomy and biomechanics of locomotion, **thinks** the changes may have improved coordination as well. 'To walk upright in a habitual way, you have to do so in synchrony,' he says, 'If the ligaments and muscles are out of synch, that leads to inju-

Evolution teaches that everything evolved through "natural selection."

ries. And then you'd be cheetah meat."

Isn't it amazing! There had to be changes in the skeletal structure, especially the spine, pelvis, leg bones, foot bones, etc. On top of all that there had to be muscular changes and the balance of the body had to be changed. Then, to finish it all off, it all had to be properly synchronized. It really does sound UNNATURAL and BIZARRE doesn't it?

Now the question is, Without the knowledge to make and

utilize complex tools, without the ability to even begin to gather, recognize and utilize the knowledge that man has available today, how did some unintelligent creature, some animal, decide to redesign itself in order to fulfill different needs? And these creatures had to be able to do this without even knowing what they were doing to begin with!

With all of the knowledge and ability that man has today, why can't we just decide to redesign ourselves to fit the needs that we face on a daily basis? After all, some of the modern day evolutionist are beginning to speculate that many of the supposed changes that took place in the distant past did so much more quickly than the much slower rate of change over millions of years taught in earlier years.

Remember that this statement was made, "...evolution **d-demands an explanation** for why it persisted. So why don't evolutionists demand the explanation? Why don't evolutionists demand an explanation for something UNNATURAL to have taken place through a process they call NATURAL SELECTION?

AN IMPORTANT ADMISSION

One of the most important paragraphs of the whole article states, "...if you're going to bring home the bacon, or the Miocene equivalent, it helps to have your hands free to carry it. Over time, female apes would choose to mate only with those males who brought them food—**presumably** the ones who were best adapted for upright walking. Is that the way it actually happened? **Maybe, but we may never know for sure.** Leakey, for one, is un-

convinced. **‘There are all sorts of hypotheses,’ she says, ‘and they are all fairy tales really because you can’t prove anything.’**”

Now here is an honest statement, the proof of the pudding, and the real truth of the matter. As we have seen, there are many so-called theories, which are deducted by different scientists who have their so-called facts before them. We have already seen that in reality, their Theories of Evolution really fit the colloquial use of the term “Theory” rather than the declared scientific version. To review, the colloquial version of “Theory” means to contemplate, speculate, uncertain, risky, etc. The scientific version of “Theory” means a formulation of apparent relationships or underlying principles of certain observed phenomena which has been verified to some degree.

In reality, their “theories” are “hypotheses” as Leakey stated, which imply an **inadequacy of evidence in support of an explanation that is tentatively inferred**, often as a basis for further experimentation.

Isn’t it amazing that these scientists accuse creationists of believing in some Bronze Age myths, and yet, they will admit that they can’t prove anything, so what they are believing in is nothing more than FAIRY TALES?!!

MORE ADMISSIONS

The Time article quotes, “In the case of *Ardipithecus*, says Donald Johanson, professor of anthropology and director of the Institute of Human Origins at Arizona State University (and the man who discovered Lucy back in 1974), ‘when you put

5.5 million-year-old fossils together with 4.4 million-year-old ones as members of the same species, you’re not taking into consideration that these could be twigs on a tree. Everything’s been forced into a straight line. (pp. 60-61)

Once again, a very revealing statement! The truth of the matter is that scientists are FORCING this blasphemous evolutionary theory on themselves and the unsuspecting, uneducated public when they themselves don’t even know how it fits into the scheme of things.

As JK said, they have all the FACTS, but then he says that they don’t have ALL THE FACTS. I understand what he means by making this paradoxical statement. He means that, while they don’t have all the facts, all the facts that they do have points to evolution. However, his own colleagues

As a matter of fact, science has been dreaming up this theory of evolution for decades and that’s exactly what it is, A DREAM!

admit that there are all sorts of hypotheses, which are really fairy tales, because they can’t prove anything. Then another colleague admits that they are taking the facts and FORCING them into whatever suits their fancy without taking other realities into consideration. Such is the science (falsely so-called) of evolution, “keep that which is committed to thy trust, avoiding profane and vain bab-

blings, and oppositions of science falsely so called: Which some professing have erred concerning the faith,” 1 Tim. 6:20-21.

The article continues, “Beyond that, he’s dubious about categorizing the 5.2 million-year-old toe bone with the rest of the fossils: not only is it separated in time by several hundred thousand years, but it was also found some 10 miles away from the rest.

If *Orrorin* turns out to be a hominid, the same skepticism will apply to any claims about its pivotal position on the family tree. According to University of Tokyo paleontologist Gen Suwa, a co-discoverer of the 4.4 million-year-old *Ardipithecus ramidus ramidus*, *Orrorin* could well be ancestral to the new *Ardipithecus* remains, rather than the other way around. ‘There is nothing in the fossils, he says, ‘that would preclude such a position. But which side of the chimp-hominid split *Orrorin* occupies can be determined only by further analyses and new finds.’ Indeed, suggests Haile-Selassie, while *Orrorin* **may** be one of the earliest chimps or an ape that became extinct, it could also turn out to be the last common ancestor of humans and chimps—a creature paleontologists have been **dreaming of finding for decades**. (p. 61)

Notice that! They are dreaming of finding the last common ancestor of humans and chimps. They have been dreaming of this for decades and still haven’t found it. As a matter of fact, science has been dreaming up this theory of evolution for decades and that’s exactly what it is, A DREAM! By their own admissions, they have found no

proof and all they can do is speculate, theorize (the colloquial use) and dream.

Continuing with the article, "One of the most **intriguing questions** the new discoveries raise, says Bernard Wood, a professor of human origins at George Washington University, is whether bipedalism should still be considered the defining characteristic of being human. After all, all birds have wings, but not all creatures with wings are birds. It's already clear that eastern Africa was bubbling with **evolutionary experiments** 6 million years ago. **Maybe** two-legged walking evolved independently in several branches of the primate family. Says Wood: **'This might be** the first example of a creature it's not possible to label as hominid ancestor or chimp ancestor. But that doesn't make it the last common ancestor of both. I think it's going to be very hard to pin the tail on that donkey.'" (p. 61)

Six million years ago eastern Africa was bubbling with evolutionary experiments? How does he know that these were evolutionary experiments? Did you notice the words "intriguing questions," "maybe," "This MIGHT BE"? They don't sound very positive to this author. They just sound like conjecture, suppositions, impossible theories, etc. What about all of the animals that are lower than man? Are they still experimenting to become equivalent or superior to man?

Notice his statement that all birds have wings. How true, but some of the birds with wings can't fly. Why do they still have wings? According to the Evolutionary Theory, if something is needed, then the

creature can create whatever is necessary to fulfill that need. When something is no longer needed, then it eliminates it. Why is it that when man finds ancient apelike bones he always tries to fit the creature into a relative of man's past? There is a surprising answer to this which you will find out if you continue to read this article.

MAN'S CREATION

The Scriptures (Yahweh's Word, in case any scientists happen to read this article) say that man was created in the image of His Creator, "And Elohim said, 'Let Us make man in Our image, after Our likeness: and let them have dominion over the fish of the sea, and over the fowl of the air, and over the cattle, and over all the earth, and over every creeping thing that creepeth upon the earth.' So Elohim created man in His own image, in the image

Did you notice the words "intriguing questions," "maybe," "This

of Elohim created He him; male and female created He them," Gen. 1:26-27.

Scream and kick and deny as the scientists will, this is a true scientific statement. Much more true than their speculations that they have been dreaming up. Man was made in His Creator's image and likeness and given dominion over the earth. Isn't that what happens when man moves into an area of the earth. Doesn't he begin to dominate or rule over it?

Doesn't man exist as male and

female? If man descended from a lowly amoeba or some other so-called simple single celled creature, how did he evolve into the male and female sex, and why do that since it would be much more convenient to just multiply by dividing like those cells do.

We always hear the statement, "There is no such thing as a FREE LUNCH," even though there may be some in our society who believe that there is, because they are on the receiving end. But those on the giving end understand the truth of the matter, don't they?

Well, if we understand that there is really no such thing as a free lunch, then how can we also believe that SOMETHING (the creation as it exists) comes from NOTHING? And if what we see today, did come from something (and it did), then how did it get here and develop into the organized world that we are living in?

Science postulates that everything came forth from some kind of "BIG BANG" billions upon billions of years ago, but the problem is that by their own calculations, if everything we see in the heavens and earth were all collected into one huge body, the gravitational pulls would be so great that it wouldn't be able to escape, but it would rather collapse in upon itself.

There had to be some power behind it all and the Scriptures reveal that the power behind it all was Yahweh and His Word. The Scriptures truthfully and scientifically state, "By the Word of Yahweh were the heavens made; and all the host of them by the breath of His mouth...For He spake and it was done; He commanded, and

it stood fast,” Psa. 33:6, 9.

Again, it says, “Thou sendest forth Thy spirit, they are created: and Thou renewest the face of the earth,” Psa. 104:30.

Now, the scientists can charge that these statements are nothing more than Bronze Age myths and have nothing to do with science, but if they are true (and they are) then they are TRUE SCIENCE! And the scientists are all wet behind the ears.

ENTER CONFUSION

Man truly lives in a state of frustration and confusion in today’s world. Yes, there is confusion, much confusion in religion. There is disagreement and confusion concerning what the Scriptures mean and say. But we also have confusion and disagreement in the scientific world. The article that we just dealt with reveals the disagreement and confusion in the scientific world.

There are scientists who do believe in the Creator, but evolutionary scientists disbelieve and discount their words, as much as they will the religionists.

But what does Yahweh’s Word say about the confused state that the world lives in today? Let’s look at the account in Gen. 2 which says, “And they were both naked, the man and his wife, and were not ashamed,” verse 25.

The word “ashamed” is translated from the Hebrew word “buwsh.” It is defined as, a primitive root; properly, to pale, i.e. by implication to be ashamed; also (by implication) to be disappointed or delayed, but this same word has also been translated as “confound (-

ed), confuse (-sion).”

Therefore, verse 25 could also be translated as, “They were both naked, the man and his wife, and were not confounded (or confused).”

Does this apply? Well, after the man and his wife took of the forbidden fruit, what was the first thing that they did? They covered themselves (Gen. 3:7). This would mean that they were ashamed and now wanted to be covered so that their nakedness might not appear.

But didn’t they also become confused? How can I say that? Because they sewed FIG LEAVES together making aprons for themselves. How does this show that they were confused? Try picking figs off of a fig tree. The leaves will irritate the tender and delicate skin and Adam and Eve covered their most delicate areas of the body with these leaves. Besides, how long will fig

Man truly lives in a state of frustration and confusion in today’s world.

leaves remain in their natural fresh green state after being plucked from their source of life? Not very long at all.

Man rebelled against his Creator, disobeyed His word, His commands, and has turned to vanity, emptiness, chaos and confusion. The Scriptures reveal that today’s world is truly called Babylon the Great! Babylon comes from the Hebrew word babel which means confusion.

Man’s religion, government, education, science, etc. is in a state of confusion!

ENTER THE MONKEYS

Yahweh had created man in His own image and His own likeness. He wanted man to be like Himself, but man chose to be unlike his own Creator.

Yahweh had commanded Abraham to be perfect (Gen. 17:1). He commanded Israel to be perfect (Dt. 18:13). He also commanded them to be “holy” because He was “holy,” (Lev. 11:44).

The Hebrew word for “holy” is qodesh/qadowsh (קדוש). The first letter of this word is the Hebrew letter “kuf” (קף).

Here is what the Jewish rabbis have to say about this letter and this word, “The spelling of the letter קף is the same as that of קוף, monkey. Twice in Biblical times when men forfeited their own image of the Creator and denied His existence, their physiognomy changed and they came to resemble apes. The first time this occurred was in the generation of Enosh (*Bereishis Rabba* 23:5), when people began to make idols and call them gods (*Targum Yonasan, Bereishis Rabba* 4:26). The second time was when people built the tower of Babel and tried to gain mastery over the entire human race (*Chizkuni*) and to dispense with God (*R’ Hirsch*). Subsequently they lost their potential share in the World to Come and turned into apes, spirits, and demons (*Sanhedrin* 109a). The fact that the same letter ק represents both kedushah and an animal that is a parody of humanity offers a deep insight about man’s role. Man is created in the image of God and is

only a little lower than the angels (*Psalms* 8:6). Though he can never attain God's holiness, he is charged with emulating Him and is assured that he can scale celestial heights. But he can do so only if his efforts are concerted and sincere. If man acts as an "image of God," his potential is boundless. If he is merely a poor imitation of what man should be, he is hardly better than a primate." (*The Wisdom in the Hebrew Alphabet* by Rabbi Michael L. Munk, p. 198)

"The nineteenth letter of the Hebrew alphabet is ק, spelled קי. The numerical of ק is 100 and its energy intelligence is that of growth and holiness. Growth and holiness are related to a pulsating unabridged force of the letter נ, whose numerical value is 1, thrust into cosmic existence. And it is related to the energy intelligence of spirituality, י, whose numerical value is 10. The word קי means monkey or ape....When man does not elevate himself beyond the ordinary, when man does not act in a way to create sacredness, when man does not endow his situation with holiness, man is no more than an ape." (*The Inner Meaning of the Hebrew Letters* by Robert M. Haralick, p. 269)

"The word kuf means קי, 'monkey'; הקפה, 'to surround' or 'touch' and תקי, 'great strength.' In Aramaic it means קופא, 'the eye of a needle.' The Arizal explains that the monkey is the intermediate state between animal and man. (So do there exist intermediate states between the inanimate and vegetable, and between vegetable and animal. The concept of the 'intermediate,' more fully expounded in *Chassidut*,

is one of the basic secrets of Creation, the power of 'continuum' hidden within the 'quantum leaps' of nature). The Midrash states that the descendants of Cain (who murdered his 'human' brother, Abel) 'degenerated' into monkeys.

A monkey is a false imitation or 'copy' (from the Hebrew קוף) of man. The book of Ecclesiastes (Kohelet, קהלת, which begins with a kuf; the two subsequent letters, הל, allude to הבל, 'vanity') begins: 'Vanity of vanities said Kohelet, vanity of vanities, all is vanity.' This alludes to the seven vanities of this world (according to the principle: 'the plural indicates at least two,' 'vanity of vanities' implies three vanities; 'vanity of vanities' implies another three vanities; 'all is vanity' brings the total number of vanities to seven).

According to one interpretation of the Sages, these seven

So now we know why man always tries to fit apes and monkeys into our

vanities refer to seven periods, or seven 'worlds,' through which one passes in life. In each world one is likened to a different creature. First, when born and placed in a crib, one is like a king, to whom all come to bow down and give homage. At the age of two, one crawls the floor sticking his fingers into filth like a pig. Later, at the age of ten, one jumps and plays like a goat. At eighteen one combs his hair and runs after a mate like a horse. After marriage one bears the burden of earning a livelihood as a

donkey. Later, with a large family to support, one barks after livelihood with insolence, like a dog. Finally comes the difference: if, through one's first six worlds of vanity, one remained close and devoted to Torah, one ends his life on earth as a king, this time a real king (though, the Torah of this world, before the coming of *Mashiach*, is itself considered 'vanity' relative to the inner truth of the Torah, the inner essence of *malchut* [kingdom] inherent in Torah to be revealed by *Mashiach*). If, however, one strayed from Torah, one ends his life like a monkey. Thus, the monkey symbolizes the epitome of the vanity of this world." (*The Alef-Beit* [Jewish Thought Revealed through the Hebrew Letters] by Rabbi Yitzchak Ginsburgh, p. 286)

So now we know why man always tries to fit apes and monkeys into our ancestry. When man turns his back on His Creator and casts His word behind him, the end result is a vain way of thinking. When man denies that there is a Creator, he turns to the physical creation and instead of reaching for the higher goals of morality and righteousness, as outlined in the Scriptures, he turns himself into an animal and adopts animalistic and even sub-animalistic behavior.

The Apostle Paul reveals, "For the wrath of Yahweh is revealed from heaven against all impiety and unrighteousness of men, who hold the truth in unrighteousness. Because that which may be known of Yahweh is manifest in them; for Yahweh hath shewed it unto them. For the invisible things of Him from the creation of the

SCIENTISTS FORCED INTO A U-TURN!

"We've made an awful mistake!"

Dismay was in Dean's voice. "A student has knocked our theory to bits!"

Dr Dean Kenyon, Professor of Biology (Emeritus) at San Francisco State University, was one of the leading chemical evolution theorists in the world.

He co-authored "*Biochemical Predetermination*", which claimed

1. that the evolution of life was inevitable...
2. that proteins to produce living cells were formed directly by forces of attraction between their parts...
3. that proteins are just formed together (self-assemble) in chains, directly from amino acids, without any DNA assembly instructions.

His theory was accepted with enthusiasm by the evolutionary scientific community. But within just five years after publishing, Kenyon suddenly had serious doubts.

It began when one of his students asked, "How could the first proteins have been assembled without the help of genetic instructions?" (Proteins were the necessary information to build the first cell.)

And then DNA was discovered. This would prove fatal to Kenyon's molecular evolution theory. Kenyon confesses, "The more I conducted my own studies, including a period of time at NASA-AIMS Research Center, the more it became apparent there were multiple difficulties with the chemical evolution account.

"And further experimental work showed that amino acids do not have the ability to order themselves into any biologically meaningful sequences.

"The more I thought about the alterna-

tive that was being presented in the criticism, and the enormous problem that all of us who had worked on this field had neglected to address, the problem of the origin of genetic information itself, then I really had to reassess my whole position regarding origins." (*Unlocking the Mysteries of Life*)

What he now had to address was this: What was the source of the biological information in DNA?

"If one could get at the origin of the messages, the encoded messages within the living machinery, then you would really be onto something far more intellectually satisfying than this chemical evolution theory." (Ibid.)

The astonishing fact is that inside every microscopic-sized cell, machines work together to accomplish specific jobs and are shepherded by other specially shaped ma-

It was recently discovered that DNA is linked to music!

chines to precise locations where they are needed.

Learning this, Kenyon exclaimed, "This is absolutely mind-boggling, to perceive at this scale of size, such a finely tuned apparatus, a device, that bears the marks of intelligent design and manufacture!"

OBSERVABLE EVIDENCE OF A MASTER DESIGNER

This is observable evidence of thoughtful, programmed designing by some Superior Mind. Evidence of intelligently organized patterns.

MUSIC IN GENES

Something else. Did you know this? It was recently discovered that DNA is linked to music!

If you like music, but think that you can't carry a tune, you may be wrong.

Respected geneticist, Susumo Ono, believes he's discovered music in genes – particularly human genes, fish genes and rabbit genes. Susumo is a researcher in DNA.

He asked himself, If we were to assign a musical note to each chemical on the DNA strand and string those notes together and play them, what would DNA sound like?

So he did this – and the result was amazing.

He discovered musical patterns of notes, that again reveal intelligence.

Susumo Ono was so astonished that he took his findings to musicians.

And musicians, in turn, were astonished to hear echoes of Bach, of Schubert, of Mozart in DNA music.

Using the same formula for converting DNA into music, Dr Ono worked backwards and translated Chopin's funeral march into chemical symbols. It came out cancer!

Skeptics naturally point out that these strands of DNA produce only a string of single notes; it is the musicians who fill in the rhythm and the harmony.

But the bottom line is this: Whichever way you look at it, the PATTERNS of single notes testify to intelligence as the source of DNA.

Certainly it is not from a blind, accidental force in nature.

IDENTICAL TO WRITTEN LANGUAGE

But there's more, much more.

Scientists at Bell Laboratories conducted studies on the mathematical language in the DNA molecule.

And what did they find? Its mathe-

matical pattern is identical to that of conversational language.

Concerning DNA, Charles Thaxton states: "A structural identity has been discovered between the genetic message on DNA and the written messages of a human language." (Charles Thaxton, "A New Design Argument," Cosmic Pursuit 1, no. 2, Spring 1998)

Hupert Yockey explains: "There is an identity of structure between DNA (and protein) and written linguistic messages.

"Since we know by experience that intelligence produces written messages, and no other cause is known, the implication, according to the abductive method, is that intelligent cause produced DNA and protein.

"The significance of this result lies in the security of it, for it is much stronger than if the structures were merely similar.

"We are not dealing with anything like a superficial resemblance between DNA and a written text.

"We are not saying DNA is like a message. Rather, DNA is a message. True design thus returns to biology." (Hubert P. Yockey, "Journal of Theoretic Biology")

Since there is no doubt in anyone's mind it takes intelligence to write a language, it is evident that it took intelligence to write the DNA code.

INTELLIGENTLY DESIGNED 'SENTENCES' IMPRESSED FROM THE OUTSIDE

Dean Kenyon was asked if DNA comes in intelligently designed 'sentences'.

INTERVIEWER: "And is it true that when scientists peer into the microscopic world of DNA, they find not mere random arrangements, but well-written 'instruction books'?"

KENYON: "Yes. Masterpieces of immense intricacy and subtlety."

INTERVIEWER: "And you argue that these biological 'sentences' in

DNA could not have arisen merely by material means, as evolutionists suggest?"

KENYON: "No. Just as the chemistry and physics of ink and paper do not determine the order of symbols in a printed text, but that order must be impressed on the ink from the 'outside', so also the order of the bases, or sub-units, in DNA [adenine, thymine, guanine, and cytosine, or A, T, G, and C as commonly represented] is not determined by the known chemical tendencies of these individual sub-units, but instead appears to have been impressed from the 'outside' on the sub-units to create just those sequences that make biological sense.

The fantastic complexity and orderliness of the DNA code – condensed into an incredibly tiny size – suggests the work of a brilliant intellect rather than chance processes.

It suggests that much thought has gone into their design – just as human beings use intelligence to design and construct computers, Jumbo jets, space craft and other intricate equip-

Since there is no doubt in anyone's mind it takes intelligence to write a language, it is evident that it took intelligence to write the DNA code.

ment.

If radio signals were to be received from outer space, they would be understood as evidence of an intelligent source.

Why then should we not regard the message sequence on the DNA molecule as prima facie evidence of an intelligent source?

DESIGNED NOT TO EVOLVE

But that is not all! Gene code letters have built in error protection!

Genes store information in long strings of DNA, in the form of chemi-

cal letters, called A, T, C and G.

So that genes can be accurately copied, each gene consists of two parallel strands of DNA held together by links between the code letters of one strand and those of the other strand.

The two strands are not identical. That is, A's do not link to A's, and so on.

Instead, they are complimentary. A's always link to T's; C's always link to G's.

Donail MacDonaill of Trinity College, Dublin, studied that pattern of linkages between letters.

And he found that they form a parity code similar to computer codes, to minimize mistakes during the electronic transfer of information. (Nature science update, www.nature.com/nsu September 18, 2002)

Now is the moment of truth. No one would be so naïve as to believe modern electronic parity codes could have evolved by chance. They were carefully planned by software designers.

The parity code found in DNA is further evidence the genetic code was deliberately created.

It also reminds us that DNA is designed to maintain accurate copies and avoid changes in the information it carries.

This means it was designed to NOT evolve. But rather to reproduce its own kind forever.

Come to think of it, wouldn't that make evolution scientifically impossible?

By Jonathan Grey

Our editorial comment concerning this article begins on the next page with the title The Great Witness of DNA..

THE GREAT WITNESS OF DNA!

Are you beginning to understand the awesomeness of our GREAT CREATOR? Isn't it fantastic and awesome that the DNA chemical letters are A and T? Do you realize what this means? The A is equivalent to the first letter of the Hebrew alphabet, the *aleph* (א), and the T is equivalent to the last Hebrew letter, the *tau* (ט) (Pictorial Hebrew)

Yahshua said that He is the *aleph* and *tau* (Rev. 1:8)! Being the *aleph* and *tau* means that He is the beginning and ending, the first and the last.

The discovery of DNA and its letters marks us as belonging to Him! We are His creation! DNA is a most powerful witness and sign that such is absolutely true!

Furthermore, the C and G letters of DNA are another testimony. Both of these letters are equivalent to the third Hebrew letter, the *gimel* (ג) (Pictorial Hebrew). Take a close look at this letter! Does it not look like a strand of DNA!?

The representation of the *gimel* as revealed in the preceding paragraph is a much more ancient representation than the more typical *gimel* that looks like a foot in its other Pictorial Hebrew representation (𐤂), and the later Paleo Hebrew (𐤂).

There are special hidden meanings here. The more ancient usage (𐤂) was abandoned in favor of the second representation (𐤂). But it is interesting that on the computer keyboard, the (𐤂) symbol is represented by the letter "C", while the more ancient representation is represented by the letter "G".

HIDDEN MEANINGS

This author has been led to discover so many, many marvelous things in Yahweh's word, and His creation. (No bragging here, but humility, because I understand that I was born totally ignorant. I had to learn the things of this world, which, of course, is Yahweh's

creation. Then I have had to learn the things of Yahweh. My Master and Teacher is Yahweh. What I have learned is not for the purpose of lifting myself up, but to reveal the glorious wonders of Yahweh, and all that has been done through Yahshua the Messiah.)

What has been revealed to this author is that the DNA is a tool, an instrument of Yahshua, Who is the Aleph, and, Tau (אט) to bring forth life (𐤂).

A former article and research that I did on the science of cymatics revealed that various images could be created with an instrument called a tonoscope wherein sand or iron filings, etc. could be placed on a plate and with various sounds, tones, frequencies, etc. certain shapes would appear. This led the scientists to deduct that everything in existence, exists via sound waves (YWM Jul.-Aug. 2005).

Now, we find that DNA is linked to

***Yahshua, the Aleph (א),
and Tau (ט), spoke, sang,
the creation into exis-***

music!

Here is an excerpt from our article on Cymatics, "In his research with the tonoscope, **Jenny noticed that when the vowels of the ancient languages of Hebrew and Sanskrit were pronounced, the sand took the shape of the written symbols for these vowels, while our modern languages, on the other hand, did not generate the same result!** How is this possible? Did the ancient Hebrews and Indians know this? Is there something to the concept of "sacred language," which both of these are sometimes called? What qualities do these "sacred languages," among which Tibetan, Egyptian and Chinese are often numbered, possess? Do they have the power to influence and transform physical real-

ity, to create things through their inherent power, or, to take a concrete example, through the recitation or singing of sacred texts, to heal a person who has gone "out of tune"?" (YWM, Jul.-Aug. 2005, p. 15)

The original Scriptures prove that Hebrew is the heavenly language. Cymatics proves that only Hebrew and Sanskrit vowels form images.

Yahshua, the *Aleph* (א), and *Tau* (ט), spoke, sang, the creation into existence. The DNA proves that only the A and T (*aleph* and *tau*) combine, and the C and G (the two letters for the *gimel*) combine together.

If we take the *aleph* and *tau*, and combine them we get אט.

But there is a Hebrew word that also describes this combination. That is the Hebrew word for "sign" which is the Hebrew word "owth" (אוֹת), pronounced like "oat". The *waw* (ו) is the Hebrew letter that serves as a conjunction or hook.

Now, let's look at the more general form of the *gimel* in the pictorial Hebrew (𐤂), and the Paleo Hebrew (𐤂).

Here is what this teaches this author. There is nothing that exists before the *aleph*, nor after the *tau*. The *aleph-tau* (אט) brought forth the creation, and life in that creation through the power of His word (which includes all of the Hebrew letters). The life (DNA) would be represented by the more ancient form of the *gimel* (𐤂).

The more general form of the *gimel* is in the form of a foot (𐤂). The earth is Yahweh's footstool (Isa. 66:1; Mt. 5:35).

Scripture reveals that Yahshua emptied Himself of the power, honor, esteem, glory, etc. that He had as Creator Elohim and descended to the earth (Phil. 2:5-8). It is interesting to note that Yahshua descended to earth (Yahweh's footstool) during the time

of the great, and dreadful, and terrible beast (Dan. 7), which was the Roman Empire. The form of Italy is that of a foot or boot.

The Paleo Hebrew *gimel* (𐤂) is likened to the head of a camel which represents something that is lifted up. Yahshua said that He came to be lifted up as Moses lifted up the serpent in the wilderness (Jn. 3:14).

The Hebrew for “Redeemer” is *ga’al* (גאל, Paleo Hebrew). This form would give us the general idea that we are redeemed by the “lifting up El” since the term for El is ג in Paleo Hebrew!

The Aleph and Tau (Yahshua as Yahweh in His pre-existent heavenly state) descended from heaven, becoming flesh, in order to be combined with the Tau at the end of His life so He could create a way of escape for His people who had come under the curse of sin and death. Thus the sign (𐤂/owth) was that the Aleph (𐤀) and Tau (𐤅) were joined, nailed, hooked (Y) together.

In His descent to the earth (𐤅) from heaven, and being lifted up (𐤂), we are given life (𐤅). The *Aleph* and *Tau* combine, and the *gimels* combine.

GIMEL’S MODERN DAY FORM

The modern day form of the *gimel* looks like this: ג.

L. Grant Luton writes, “Traditionally, *gimel*’s form—ג—is said to resemble a man, head bent, determined to make his way from the second letter to the fourth (which is the *dalet* [ד]). What is the *gimel*’s mission? The Sages teach that *gimel* (ג) came from inside the ב (*beit*, the “house”), and is on an important mission to *dalet* (ד), the fourth letter. They describe *gimel*’s mission as one of mercy to bring food and nourishment to (ד). But, should *dalet* (ד) prove stubbornly closed to *gimel*, then punishment will result. (The possibility that *gimel* may bring punishment is due to the fact that *gimel*’s name may also be pronounced

g’mal, meaning “recompense.”) The name of the *dalet* (ד), the letter to which *gimel* is traveling, literally means “door.” From these four letters a story begins to unfold: The Father (א) and His Son (ב) sent forth someone (ג) to nourish one who lives behind a closed door (ד). Aside from being a picture of a door, *dalet*’s name comes from the root word *dahl*, which means “weakness” and “poverty.” Could an illustration of the gospel be any plainer? It is amazing to think that when God designed the Hebrew alphabet, He did so with the message of the gospel in mind....In our discussion of *gimel* (ג), let us not neglect its relationship to the two letters that precede it, the א and ב, which together spell אב (Av, “Father”). Yahshua said, “When the Counselor (ג) comes, whom I will send to you from the Father (א), the Spirit of truth who goes out from the Father, He will testify about Me (ב).” (*In His Own Words*, pp. 40-41)

The representation below shows the

א ← ג ← ד

flow of the *gimel*, which is coming out of the Father’s house (ב), heading towards the *dalet* or door (ד).

“The *gimel* is composed of a *vav* (ו *waw*), representing an erect man, with a lower *yud* (י), a foot in motion,” *The Alef-Beit* by Rabbi Yitzchak Ginsburgh, p. 54.

“The shape of the ג resembles a גמל [*gamal*], camel, with its long neck,” *The Wisdom of the Hebrew Alphabet*, by Michael Munk, p. 71.

Are you beginning to understand that the Hebrew Alphabet, in its three forms, Pictorial, Paleo, and Modern, is explaining Yahweh’s plan of salvation in His Son Yahshua the Messiah? His plan is revealed in His word (the Scriptures, in the heavens above (as revealed in our booklet entitled *The Heavens Declare Yahweh’s Glory*), in

the Hebrew alphabet, and even in our own bodies, our DNA!!!!

YAHWEH’S KINDNESS

Michael Munk writes, “The camel received its name because it is like a ‘weaned’ child and can go for a long time without drinking (R’ Hirsch, Genesis 21:8). Furthermore, the camel is equipped physically to endure tremendous stress, which enables it to help travelers survive the perils of the desert. Thus the camel is a *gomel chessed*, a performer of kindness.” (*The Wisdom in the Hebrew Alphabet*, p. 71)

Robert M. Haralick writes, “As a noun גמל (*gimal*) means *remuneration* and גמל (*gamel*) means *mature*. There is the verb root גמל (*gimal*), meaning to *drive a camel*. The associated noun גמל (*gamal*) means *camel* and גמל (*gamal*) means *camel driver*. But there is more than this, for the camel received its Hebrew name גמל not only because its long neck resembles a ג, but because it can go for a long time without drinking just as a weaned child can go for a long time without drinking.

The energy intelligence of ג is then able to bring the desires of the conscious mind into being by nourishing until completely ripe, weaning it from the realm of desire or thought until it is in the realm of complete manifestation. It is thereby able to manifest the wealth of the conscious mind even if that means driving a camel through the desert or through the wilderness of the abyss.

The shape of ג is that of a י that represents the erect man with a י for its feet in motion. Why are the feet in motion? They are in motion to enable the man to run and find those poorer than he is so that he may give them nourishment. Because it is fitting for the benevolent to run after [seek out] the poor. And this is the meaning of גמילות חסדים (*gemylut chesadim*), the practice of loving kindness or the practice of loving deeds.” (*The Inner*

Meaning of the Hebrew Letters, p. 46)

Rabbi Yitzchak Ginsburgh also writes, “The English word ‘camel’ derives from the name of the Hebrew letter gimel. The camel symbolized he motion of travelling through the desert, the journey of life on earth. Carrying the burdens of life as well as rewards, the camel stores within itself the waters of kindness necessary to exist in the dry desert. The camel brings life into the lifeless desert...” (*The Alef-Beit*, p. 58)

King David wrote, “O Yahweh, rebuke me not in thy wrath: neither chasten me in thy hot displeasure. For thine arrows stick fast in me, and thy hand presseth me sore. There is no soundness in my flesh because of thine anger; neither is there any rest in my bones because of my sin. For **mine iniquities are gone over mine head: as an heavy burden they are too heavy for me.** My wounds stink and are corrupt because of my foolishness. I am troubled; I am bowed down greatly; I go mourning all the day long. For my loins are filled with a loathsome disease: and there is no soundness in my flesh. I am feeble and sore broken: I have roared by reason of the disquietness of my heart.” Psalms 38:1-8.

Our great burden (-s) is the sins that so easily beset us. But the Psalmist encourages, “**Cast thy burden upon Yahweh**, and he shall sustain thee: he shall never suffer the righteous to be moved,” Psalms 55:22.

Yahshua came to bear our sinful burdens, “Surely **he hath borne our griefs, and carried our sorrows**: yet we did esteem him stricken, smitten of Elohim, and afflicted. But **he was wounded for our transgressions, he was bruised for our iniquities: the chastisement of our peace was upon him**; and with his stripes we are healed. All we like sheep have gone astray; we have turned every one to his own way; and **Yahweh hath laid on him the iniquity of us all.** He was oppressed, and he was afflicted, yet he opened not his mouth: he is brought as a lamb to the slaughter, and as a sheep

before her shearers is dumb, so he openeth not his mouth. He was taken from prison and from judgment: and who shall declare his generation? for he was cut off out of the land of the living: for the transgression of my people was he stricken. And he made his grave with the wicked, and with the rich in his death; because he had done no violence, neither was any deceit in his mouth,” Isa. 53:1-9.

Our sinful lives are like being in an empty and barren desert, or wilderness. Yahshua, as the *gimel* (ג), is the One Who administers the loving kindness of Yahweh to us all.

THE FLOW

Robert Haralick writes, “...the ג has a head on top, and is like a pipe. Just like a pipe, the ג draws from above through its head, and disperses through its tail. This is the ג.

Rabbi Kaplan interprets this to mean that ג draws wisdom from above and dispenses wisdom through its tail. (*The Inner Meaning of the Hebrew Letters*, p. 48)

Our great burden (-s) is the sins that so easily beset us.

Rabbi Yitzchak Ginsburg writes, “The foot of the *gimel* (ג), symbolized by the *yud* (י), is the ability to give a part of oneself to another. The *yud*, the smallest yet most compact and concentrated of the letters, represents a point of essential self, a seed of reproduction. Its lower position, as the foot of the *gimel*, is the secret of actual giving to another. In Kabbalah, we are taught that **the head symbolizes receiving; the body, integrating with oneself; the feet (including the *brit*), giving to another.** When the *yud* of the *gimel*, the rich man or male, is given to the *dalet* (ד), the poor man or female, the *dalet* becomes an impregnated *hei* (ה). This explains the sequence of these three letters: the *gi-*

mel, the rich man, running after the ‘static’ *dalet* (as a door, merely able to turn on its hinges, to open or close), the poor man, in order to fill his needs, the *hei*.

At the level of worlds, **the run of the rich to the poor, the full to the empty**, is engraved in the laws of nature. **Water** (the masculine power of *chesed* [lovingkindness and charity]) *runs down to fill the lowest, empty basin. Higher energy states run to lower energy states.* In living creatures, parents bear and thereafter care for and feed offspring. The *gimel* gives life, the pulse of ‘**run and return**,’ fully to become manifest in the letter *chet* (ח), the letter of life, as will be explained.

As explained above, the *gimel* is in a state of motion, primarily downward, to infuse the previously lifeless body with life: ‘And He blew into his nostrils the breath of life, and man became a living creature.’” (*The Alef-Beit*, pp. 54-55)

What is being said here? This is all wrapped up in mysteries of the kingdom of heaven! When Yahshua, the Word of Yahweh, created the heavens and the earth, including the man (Adam), a door was opened.

Yahshua breathed into Adam’s nostrils the breath of life and Adam and Eve became living souls/beings/creatures. The name Adam is constructed to reveal the true meaning in the Hebrew. His name consists of *aleph* (א), *dalet* (ד), and *mem* (מ), the final form of the letter מ (*mem*).

This tells us that Adam is the first, chief, head of men (א), who is the door (ד), of all who are born into this physical, fleshly, carnal world.

The *mem* (מ/ם) is the picture of water in the Pictorial and Paleo Hebrew (𐤎/𐤌). Yahshua likened water to the Holy Spirit in John 7:37-39. The English word for spirit, is generally translated from the Hebrew word *ruach*, which is also variously translated as

(Continued on page 22)

CONSIDER THE GIRAFFE

Hello everyone, my name is George the giraffe. I have been asked to speak to you about the evolutionary process that brought me to the point that I exist today. Honestly, we have been able to do some marvelous things in the process. This is the story that I want to relate to you.

Evolution is such an amazing thing. It has taught our species to do so many things that are seemingly impossible in today's world.

I am a big bull giraffe that stands 18 feet tall! I can reach as high as 22 feet! It would take a pretty long ladder for you to reach my height. Some people wouldn't be able to make it that high as they are afraid of heights. I must say that it is a good way to the ground from up here.

Evolutionists claim that we had to grow this tall in order to reach those tasty scrumptious leaves that grow on the taller bushes and trees. Now, please don't ask me to answer any questions as to why the answer to our problems of food for our survival caused us to grow this tall. After all, you know....we just live for today and the moment. We don't say much of anything so when someone doesn't talk much, it's really hard to keep the history of our origins in the forefront of our minds. We just don't talk about what happened yesterday, as a matter of fact, we don't even think of yesterday, and we certainly don't make any plans for tomorrow. You know, we just take things as they come. It is strange though, that we evolved our height to reach those leaves while other vegetarian creatures like monkey, etc. just learned to climb up that high.

My neck is 10 feet long! At least, that's what I have been told by men who are able to utilize rulers and measuring tapes. Let's see, if I had gone to school and learned some arithmetic, I would have been able to fig-

ure this out for myself, but who cares about school and learning. I had rather wander among the trees, my favorite place because that's where my food is. Anyway, it is an engineering marvel. Pretty good for someone who has never looked at a drawing board, never been to school, never learned to count, never learned my A,B,C's, etc. right? In reality, for us to be able to design and engineer ourselves without the knowledge to do so is such an amazing thing!

Speaking of counting, did you know that I only have seven neck bones? You also have seven neck bones, and the tiniest mouse has seven neck bones. How did we all figure that one out together? Did you know that seven is a very important number? There is the Scriptural account where Elohim created the heavens and earth in six days, and rested on the seventh. There are seven annual holy days that reveal to Yahweh's people His plan of salva-

Speaking of counting, did you know that I only have seven neck bones?

tion and completion.

I think that there may be some spiritual implications concerning the head of a body sitting on seven neck bones. The neck connects the head to the rest of the body. I think that the Scriptures say that Yahweh the Father is the head of the Messiah, Who is, in turn, the head over the men, and the men are to be the heads over the women (1 Cor. 11:3). Furthermore, the assembly of believers is the body (Eph. 1:22-23; Col. 1:24). The neck, with its seven neck bones could be a type of Yahshua, Who is the Mediator between heaven and earth (1 Tim. 2:5). He joins the head (the Father) to the body (the assembly). He has seven one thousand year days (Peter says a

thousand years is as one day, and a day as a thousand years [2 Pet. 3:8]) to complete His plan and to bring forth a new heavens and earth wherein dwells righteousness (See Rev. 21 and 22). At that time the assembly will be given an incorruptible, immortal body that the Father, through Yahshua can dwell with and in for all eternity.

OTHER AMAZING WORKS!

In order to pump the all important blood to our brains, we giraffes had to perform another marvelous miracle. We had to develop a huge heart to do the job. Our hearts are about 2 feet long and weigh about 25 pounds! (All of these numbers, weights, and measures are making me dizzy.) But my heart has to be large and strong in order to pump the blood up to my brain. As big and strong as our hearts are, you would think that we would suffer from high blood pressure, or that it would blow out our brains, but the law of gravity helps to adjust the pressure so that the pressure is just right by the time it reaches our brains.

I wonder where this law of gravity came from. You know, there is a body of lawmakers in Washington D.C. There are bodies of lawmakers in all of the 50 states. Men make laws for men to live by. If there was no body of legislators, then there would be no law for men to govern themselves by. This means that where there is no lawmaker, there is no law. The existence of law demands a lawgiver. The law of gravity wasn't made by men. It existed before men. So there has to be a greater lawmaker than man.

This works well for us while our heads are extended high above our bodies reaching for leaves in the branches of the trees, but what happens when we have to lower our head to get an all important drink of water? Won't the excessive pressure blow our brains out? Well, thankfully our ancestors learned to work around this

problem by devising a system of valves in the arteries so that when we lower our heads the valves automatically shut the blood flow and pressure down. But what about the blood that is beyond the last valve that is just entering the brain? It still has the normal strength of the pressure on it, but once again, my ancestors devised a spongy "wonder net" of blood vessels under our brain that automatically soaks up any extra blood, and takes the pressure off of the brain. The "wonder net" then slowly empties the blood into our brain so that we don't get dizzy, or pass out, or suffer a stroke.

But then our ancestors had to deal with another problem. Since the heart has to produce strong pressure to send the blood to the brain, what about the blood that comes out of the brain traveling to the rest of the body? You know, the lungs, kidneys, and even the heart itself. (I have never had a course in anatomy so I'm not sure how I know all of these things.) The pull of gravity, in combination with the pressure from our heart, should cause the blood to rush down our necks and blow out our other organs. It just so happens that we developed another system of valves in the veins so that they would regulate the blood rushing back down from the head to the rest of the body.

I have no idea how many of our ancestors died over the millions of years evolutionists say that we took to evolve as we are today. Which ancestor was it that was able to figure all of this out? Which ancestor figured that we needed long necks to reach those leaves way up there? How did he know that he needed a large super-powerful heart to pump blood up so high? How did he know that we only needed seven bones in our neck? How did he know that we needed a system of valves in our arteries to cut the blood pressure down when we lowered our heads? How did he know that we needed a "wonder net" to absorb the extra blood to keep us from getting dizzy and even passing out. How

did he know that we needed a system of valves to regulate the blood pressure going back down our necks to the rest of our bodies? It really isn't something that could just slowly develop over time because everything has to be designed to work perfectly all at the same time or we just die.

Everything had to be put together suddenly, all at one time. It had to work perfectly from the start. When I was born into this world, I didn't have to think about how I was made. I am so glad that one of my ancestors was so wise and intelligent that he was able to design us from the beginning.

Or was it my ancestors? I never went to school. I never learned anything that has to do with design, engineering, etc. My first ancestor would have been just like me. He never was schooled, never looked at a drawing board, never took courses in anatomy, science, math, design, engineering, etc. (I'm getting dizzy again! HELP!!!!) I think that the only way that I could ever have come into existence with the attributes that I have for life and survival is if a super intelli-

Evolution may appear to be wise to man, but it will soon be made to be utterly foolish and empty.

gent Creator placed my ancestors here. As a matter of fact, our make-up demands a super intelligent Creator.

I think that there is a Psalm that applies here. It goes like this, "Praise ye Yahweh. Praise ye Yahweh from the heavens: praise him in the heights. Praise ye him, all his angels: praise ye him, all his hosts. Praise ye him, sun and moon: praise him, all ye stars of light. Praise him, ye heavens of heavens, and ye waters that be above the heavens. Let them praise the name of Yahweh: for he commanded, and they were created. He hath also stablished them for ever and ever: he hath made a decree which shall not pass. Praise Yahweh from the earth, ye dragons,

and all deeps: Fire, and hail; snow, and vapour; stormy wind fulfilling his word: Mountains, and all hills; fruitful trees, and all cedars: **Beasts**, and all cattle; creeping things, and flying fowl: Kings of the earth, and all people; princes, and all judges of the earth: Both young men, and maidens; old men, and children: Let them praise the name of Yahweh: for his name alone is excellent; his glory is above the earth and heaven. He also exalteth the horn of his people, the praise of all his saints; even of the children of Israel, a people near unto him. Praise ye Yahweh," Psa. 148:All.

Yes, I will praise Yahweh for all of His marvelous wonders! My own existence declares His praise, His power, His honor, His esteem, His glory, His marvelous infinite intelligence!

Evolutionists are going to wake up one day, and they are going to understand how their wisdom has been made foolish, "For it is written, I will destroy the wisdom of the wise, and will bring to nothing the understanding of the prudent. Where is the wise? Where is the scribe? Where is the disputer of this world? Hath not Yahweh made foolish the wisdom of this world?" 1 Cor. 1:19-20.

Do you really want to be wise, or do you want to be foolish? Scripture says, "The fear of Yahweh is the beginning of wisdom: And the knowledge of the holy ones is understanding," Prov. 9:10. Evolution may appear to be wise to man, but it will soon be made to be utterly foolish and empty. So how about you? Do you want today's wisdom that is really foolishness, and passes away, or do you want the wisdom that endures for all eternity? Follow the Proverb, follow Yahshua, follow Yahweh's word, give Him the praise that He deserves, and live.

As for me, I'm getting weak from hunger, and am still dizzy from all of this thinking. Wow! Look at those delicious leaves on that tree over there! Dinner, here I come!

By Jerry Healan

THE WAW VAV

The sixth letter of the Hebrew alphabet is the *waw* or *vav*, depending on which Hebrew dialect one speaks. It serves as both a consonant, or a vowel. As a consonant, it generally carries the "v" sound. But as a vowel, depending on which Hebrew word it is in, it can carry every vowel sound; a, e, i, o, u, and oo (w), as also do all of the Hebrew letters that serve as both consonants and vowels. It looks like this ו/ו/ו respectively in the Pictorial, Paleo, and Modern Hebrew. Its name *waw* or *vav* in the Hebrew means hook, nail, or tent peg. It also serves as the number six (6).

The *aleph* (א/א/א), *hei* (ה/ה/ה), *waw/vav* (ו/ו/ו), *yod* (י/י/י), and *ayin* (ע/ע/ע) all serve interchangeably as consonants and vowels. Each of these letters can carry almost all of the vowel sounds enumerated in the above paragraph, especially the *aleph*, *hei*, *waw/vav*, and *ayin*.

It is generally spelled וו/וו/וו (*waw/vav*), but can also be spelled וו/וו/וו, or וו/וו/וו. The gematria of וו is 12, the gematria of וו is 13, and the gematria of וו is 22. It serves as the number six (6), but the addition of the two waw's in its name adds to twelve (ו [6] + ו [6] = 12). Twelve, of course, is a very significant number with Yahweh because the original sons of Jacob/Israel were twelve. There are generally twelve months (moons) in a year. The Mazzaroth (Zodiac) consists of twelve signs. There were twelve loaves of shewbread on the table in the tabernacle and later the temple. Yahshua originally chose twelve apostles. There will be twelve gates into city of New Jerusalem (Rev. 21) and twelve foundation stones (Rev. 21).

Twelve is Yahweh's number for government. He made Adam on the sixth (6/1) day, and thus, the number for

man is six (6/1). He made Adam the Sovereign, gave him dominion, over the earth (Gen. 1:26-28). Therefore, we have the ו (sixth day), and man's number ו (six) which equals to ו + ו = 12 (dominion/sovereignty).

If we spell the *waw* as וו, then we get the number 13 (ו [6] + ו [1] + ו [6] = 13). This is interesting because Jacob adopted the two sons of Joseph as his own sons, which made thirteen tribes instead of twelve. The Hebrew word for "one" is *echad*. The gematria for *echad* (אחד) is thirteen (א [1] + ח [8] + ד [4] = 13). The name Levi means *to join* or *unite*. The Levitical priesthood was established to bring Yahweh and Israel into a united relationship. It is also interesting that America became united into a nation through thirteen original colonies. That is the reason for the thirteen stripes on the U. S. flag.

The number six has to do with physical completion.

If we spell the *waw* as וו, then the gematria is twenty-two (ו [6] + ו [10] + ו [6] = 22). This is also interesting because there are twenty-two original letters in the Hebrew alphabet. What is also interesting is that the 22nd letter of the first verse of Genesis is the

בראשית ברא אלהים ת השמים ואת הארץ

waw (ו). Let's take a look at this verse:

Bereshiyt bara Elohim et ha she-mayim ve et ha erets, which looks like this in the Hebrew:

The point here is that the *waw*, being a hook or conjunction, appearing as the 22nd letter of the first verse of Genesis, is bringing together, hooking together the heavens with the earth. This

is a type of Yahshua Who is the Aleph and Tau (Rev. 1:8, etc.). The Aleph and Tau, being the first and last letter of the Hebrew alphabet which includes all 22 letters of the alphabet. This brings to remembrance the Scriptures that witness that Yahshua is the One Who brings together in one all things in heaven and in earth, "That in the dispensation of the fulness of times **he might gather together in one all things in the Messiah, both which are in heaven, and which are on earth**; even in him," Eph. 1:10. Again, Paul writes, "For it pleased the Father that in him should all fulness dwell; And, having made peace through the blood of his cross, **by him to reconcile all things unto himself**; by him, I say, **whether they be things in earth, or things in heaven**," Col. 1:19-20.

The number six has to do with physical completion. This has to do with the six main directions of the physical world. They are up, down, before, behind, right, and left, or up, down, north, south, east, and west. (*The Wisdom in the Hebrew Alphabet* by Michael Monk, p. 94) Elohim completed the physical creation on the sixth day (Gen. 1:31, 2:1).

DIVISION AND (1) UNITY

The Scriptures decree, "In the beginning Elohim created the heavens and (1) the earth. And (1) the earth was without form, and (1) void; and (1) darkness was upon the face of the deep. And (1) the Spirit of Elohim moved upon the face of the waters. And (1) Elohim said, Let there be light: and (1) there was light. And (1) Elohim saw the light, that it was good: and (1) Elohim divided the light from the darkness. And (1) Elohim called the light Day, and (1) the darkness he called Night. And (1) the evening and (1) the morning were the first day," (Gen. 1:1-5).

Do you see how Yahweh created by dividing, but utilized the *waw* (ו) as a conjunction, and/or hook to hold it together? Thus, even though the darkness and light were divided, they were hooked together with the *waw* (ו) to bring about one day. Also, as already alluded to, in Yahshua, the heavens and earth are brought together in one.

It continues, "And (ו) Elohim said, Let there be a firmament in the midst of the waters, and (ו) let it divide the waters from the waters. And (ו) Elohim made the firmament, and (ו) divided the waters which were under the firmament from the waters which were above the firmament: and (ו) it was so. And (ו) Elohim called the firmament Heaven. And (ו) the evening and the morning were the second day," Gen. 1:6-7.

In this account on the second day, Yahweh divided between the waters thereby creating the atmosphere which, of course was necessary in order to bring forth life upon the earth. But it is still "hooked" (ו) together into one.

"And (ו) Elohim said, Let the waters under the heaven be gathered together unto one place, and (ו) let the dry land appear: and (ו) it was so. And (ו) Elohim called the dry land Earth; and (ו) the gathering together of the waters called he Seas: and (ו) Elohim saw that it was good. And (ו) Elohim said, Let the earth bring forth grass, the herb yielding seed, and (ו) the fruit tree yielding fruit after his kind, whose seed is in itself, upon the earth: and (ו) it was so. And (ו) the earth brought forth grass, and (ו) herb yielding seed after his kind, and (ו) the tree yielding fruit, whose seed was in itself, after his kind: and (ו) Elohim saw that it was good. And (ו) the evening and the morning were the third day," Gen. 1:8-13.

Three is a type of completion. For example, it takes three lines to form a triangle. On these first three days, Yahweh is, in essence, creating the

third dimensional world wherein we exist. Notice that with the completion of the third day's activities life is able to come forth.

"And (ו) Elohim said, Let there be lights in the firmament of the heaven to divide the day from the night; and (ו) let them be for signs, and (ו) for seasons, and (ו) for days, and (ו) years: And (ו) let them be for lights in the firmament of the heaven to give light upon the earth: and (ו) it was so. And (ו) Elohim made two great lights; the greater light to rule the day, and (ו) the lesser light to rule the night: he made the stars also. And (ו) Elohim set them in the firmament of the heaven to give light upon the earth, And (ו) to rule over the day and (ו) over the night, and (ו) to divide the light from the darkness: and (ו) Elohim saw that it was good. And (ו) the evening and (ו) the morning were the fourth day," Gen. 1:14-19.

On the fourth day, Yahweh went beyond the earth's atmosphere to set the sun, moon, and stars in the solar system, yet hooking them together with

Notice that with the completion of the third day's activities life is able to come forth.

the *waw* (ו), so that they become one. The earth is "hooked" together with the solar system, which in turn is "hooked" with the universe (the stars).

"And (ו) Elohim said, Let the waters bring forth abundantly the moving creature that hath life, and (ו) fowl that may fly above the earth in the open firmament of heaven. And (ו) Elohim created great whales, and (ו) every living creature that moveth, which the waters brought forth abundantly, after their kind, and (ו) every winged fowl after his kind: and (ו) Elohim saw that it was good. And (ו) Elohim blessed them, saying, Be fruit-

ful, and (ו) multiply, and (ו) fill the waters in the seas, and (ו) let fowl multiply in the earth. And (ו) the evening and (ו) the morning were the fifth day," Gen. 1:20-23.

On the second day of creation Yahweh created the atmosphere by dividing the waters. Now, on the fifth day, He created the creatures that would live in the lower waters, and the winged fowl that would fly in the atmosphere.

"And (ו) Elohim said, Let the earth bring forth the living creature after his kind, cattle, and (ו) creeping thing, and beast of the earth after his kind: and (ו) it was so. And (ו) Elohim made the beast of the earth after his kind, and (ו) cattle after their kind, and (ו) everything that creepeth upon the earth after his kind: and (ו) Elohim saw that it was good. And (ו) Elohim said, Let us make man in our image, after our likeness: and (ו) let them have dominion over the fish of the sea, and (ו) over the fowl of the air, and (ו) over the cattle, and (ו) over all the earth, and (ו) over every creeping thing that creepeth upon the earth. So Elohim created man in his own image, in the image of Elohim created he him; male and (ו) female created he them. And (ו) Elohim blessed them, and (ו) Elohim said unto them, Be fruitful, and (ו) multiply, and (ו) replenish the earth, and (ו) subdue it: and (ו) have dominion over the fish of the sea, and (ו) over the fowl of the air, and (ו) over every living thing that moveth upon the earth. And (ו) Elohim said, Behold, I have given you every herb bearing seed, which is upon the face of all the earth, and (ו) every tree, in the which is the fruit of a tree yielding seed; to you it shall be for meat. And (ו) to every beast of the earth, and (ו) to every fowl of the air, and (ו) to every thing that creepeth upon the earth, wherein there is life, I have given every green herb for meat: and (ו) it was so. And (ו) Elohim saw every thing that he had made, and (ו),

behold, it was very good. And (1) the evening and (1) the morning were the sixth day," Gen. 1:24-31.

Six is two times three ($2 \times 3 = 6$). Notice that in the first set of three days plant life was brought forth, grasses, herbs, trees, etc. But this type of life is bound to the earth in only one place by its roots. In the second set of three days, a different type of life was brought forth, that is, life that had the freedom to move in the waters, in the air, and on the land, including the apex of Yahweh's creation, which was the man who was to be the sovereign over the earth.

But we can see from the first chapter of Genesis how Yahweh created by dividing, yet everything is "hooked" together by the *waw* (1). Almost every chapter and book in the Torah begins with the *waw* hooking it all together.

THE TABERNACLE

The tabernacle of witness made by Moses and the Israelites in the wilderness for Yahweh's habitation was made of curtains (*yeriyah*) which were connected to their pillars (*ammuwd*) by hooks (*waw* [1]).

The tabernacle was a physical man-made type of Yahweh's heavenly dwelling place. Isaiah is inspired to proclaim, "Have ye not known? have ye not heard? hath it not been told you from the beginning? have ye not understood from the foundations of the earth? It is he that sitteth upon the circle of the earth, and the inhabitants thereof are as grasshoppers; **that stretcheth out the heavens as a curtain, and spreadeth them out as a tent to dwell in:** That bringeth the princes to nothing; he maketh the judges of the earth as vanity," Isa. 40:21-23.

The Psalmist adds, " Bless Yahweh, O my soul. O Yahweh my Elohim, thou art very great; thou art clothed with honour and majesty. Who coverest thyself with light as with a garment: **who stretchest out the heavens like a curtain:** Who layeth the beams of his chambers in the waters: who

maketh the clouds his chariot: who walketh upon the wings of the wind: Who maketh his angels spirits; his ministers a flaming fire: Who laid the foundations of the earth, that it should not be removed for ever. Thou coveredst it with the deep as with a garment: the waters stood above the mountains," Psa. 104:1-6.

But the earth has been separated from Yahweh because of the sins of mankind (Isa. 59:2) so Yahweh had to drive a nail (*waw*), a tent peg (*waw*) into the ground so that He could bring heaven and earth together in one again. That nail, that tent peg was none other than the cross of Yahshua the Messiah (Eph. 1:10; Col. 1:19-20).

However, Isaiah also reveals that the one on the cross in today's world is not the true Messiah, "Thus saith Adonai Yahweh of hosts, Go, get thee unto this treasurer, even unto Shebna, which is over the house, and say, What hast thou here? and whom hast thou here, that thou hast hewed thee out a sepulchre here, as he that heweth him out a sepulchre on high, and that graveth an habitation for himself in a

In the second set of three days, a different type of life was brought forth, that is, life that had the freedom to move in the waters, in the air, and on the land, including the apex of Yahweh's creation, which was the man who was to be the sover-

rock? Behold, Yahweh will carry thee away with a mighty captivity, and will surely cover thee. He will surely violently turn and toss thee like a ball into a large country: there shalt thou die, and there the chariots of thy glory

shall be the shame of thy master's house. And I will drive thee from thy station, and from thy state shall he pull thee down. And it shall come to pass in that day, that I will call my servant Eliakim the son of Hilkiah: And I will clothe him with thy robe, and strengthen him with thy girdle, and I will commit thy government into his hand: and he shall be a father to the inhabitants of Jerusalem, and to the house of Judah. And the **key of the house of David will I lay upon his shoulder; so he shall open, and none shall shut; and he shall shut, and none shall open. And I will fasten him as a nail in a sure place;** and he shall be for a glorious throne to his father's house. And they shall hang upon him all the glory of his father's house, the offspring and the issue, all vessels of small quantity, from the vessels of cups, even to all the vessels of flagons. In that day, saith Yahweh of hosts, **shall the nail that is fastened in the sure place be removed, and be cut down, and fall; and the burden that was upon it shall be cut off:** for Yahweh hath spoken it," Isa. 22:15-25.

Today's nail (cross) driven into a sure place is the one that is named Jesus Christ. All of the treasures and glory of Elohim's house hangs upon him. But the true Messiah is Yahshua of Nazareth. When He returns to establish the kingdom of heaven on earth, the false messiah will be removed and cut off.

Yahshua will then be the true nail that is driven into the sure place. All of the treasures of the heavenly temple will hang on Him forevermore.

(Continued from page 16)

breath, air, etc. There is the “spirit” (breath/*ruach*) in man, and the “spirit” (breath/*ruach*) of Yahweh/Elohim.

All men came under the “sting of death” through their forebears Adam and Eve (Gen. 3; Ro. 5), which left us all in a dry, empty, and hopeless desert of death. The door to spiritual life was closed. But Yahshua, Who is the Word of Yahweh, the One Who spoke the heavens and earth into existence, Who has always been with the Father (Psa. 336-9; Jn. 1:1-14; 17:5, etc.), entered into this world through the door (ד), the womb and matrix of the virgin Miriam, so that He could bring grace (represented by the number 5, and the *hei* [ה] in the Hebrew alphabet) to mankind.

The idea that the Modern Hebrew presents is that the *hei* (ה) is a combination of the *dalet*/door (ד) that has been impregnated with the *yod* (י) ד.

Yahshua came from heaven (Jn. 3:13, 31; 6:33, 38, 42; Eph. 4:9). He was rich and most powerful as Elohim, but He humbled Himself, descended from heaven, becoming poor so that He might give of Himself to us making us rich also (Phil 2:7-8).

Yahshua became the second Adam (1 Cor. 15:45), which makes Him the door (Jn. 10) through Whom we are

able to enter into a new immortal, incorruptible life.

When Yahshua completed the work of redemption, He returned to the place from whence He came, that is, the right hand of the Father (Jn. 17:4-11; Heb. 1:1-3, etc.).

CLOTHING AND CIRCUMCISION

Amazingly, the second, third and fourth letters of the Hebrew alphabet (בגד), form the Hebrew word *begeed*, which is the word for clothing! (2 Cor. 5:1-4) Yahshua came to clothe us with the garments of righteousness, humility, and eternal life.

Robert M. Haralick writes, “The concealed meaning of ג can be revealed by understanding מל, which when written מל is an alternate to מול, which is the root meaning to circumcise, to cut off. What to cut off is apparent from the spiritual meaning of circumcise, which is to purify one’s heart.” (*The Inner Meaning of the Hebrew Letters*, p. 50)

Paul writes, “Beware lest any man spoil you through philosophy and vain deceit, after the tradition of men, after the rudiments of the world, and not after the Messiah. For in him dwelleth all the fulness of the Headship bodily. And ye are complete in him, which is the head of all principality and power: **In whom also ye are circumcised with the circumcision made without**

hands, in putting off the body of the sins of the flesh by the circumcision of the Messiah: Buried with him in baptism, wherein also ye are risen with him through the faith of the operation of Yahweh, who hath raised him from the dead,” Col. 2:8-12.

Are you able to see the power of the Word of Yahweh? Yahshua is the Aleph (א) and Tau (ת), the beginning and the ending, the first and the last. Yahshua told His disciples that He is the way, the truth, and the life (Jn. 14:6). He, as the Aleph (א—Pictorial Hebrew), and Tau (ת—Pictorial Hebrew), and the life (ל, ח—Pictorial Hebrew). Our own DNA bears witness to this fact.

People don’t see it, but even the Scriptures bear the mark of the Aleph and Tau. Yahweh shows that the heavens and earth are marked with the Aleph and Tau in His own word. In the book of Genesis we read, “In the

בראשית ברא אלהים את השמים ואת הארץ: beginning Elohim created the heavens and the earth,” Gen. 1:1.

The Hebrew of this verse looks like this:

Converting the Hebrew into the English, it reads from right to left, “*Bereshiyt bara Elohim et (aleph-tau) hashemayim ve et (aleph-tau) ha erets.*”

The aleph-tau is replete throughout the Scriptures just as the A and T is

that you will be able to rejoice at the evidence presented here and learn from it.

We are in the process of designing another magazine which will be similar to our “Do You Know Truth?” magazine, and our “Christmas Magazine” which will be called “The Creation Vs. Evolution Magazine.” We will publish it when we have enough articles to fill it. All of the article in this magazine will be in it, plus previous articles, and others not yet published. Please pray for our success.

JH

(Continued from page 3)

The scientists of today’s world are given their marching orders. Those orders are to do whatever it takes to prove evolution and disprove creation. They scheme, lie, manipulate, do whatever it takes to seek to make it look like the creation created itself. This is a worship of the creation without a Creator as is described in Romans 1:25.

This assembly is dedicated to revealing the most awesome, incredible mind, intellect, power, etc. in existence. Evolution is impossible. Everything exists in a most wondrous state.

We never think of the intricacies of a blade of grass, or a leaf. What about the most seemingly simple cells? Scientists are searching things out, but are not allowed to even think of “intelligent design.”

This author becomes angered and upset at the many documentary programs that reveal this awesome creation, but fall far short of giving the credit to whom, and where the credit should be due.

This issue of this magazine is dedicated to the presentation of the creation versus evolution. We truly hope

(Continued from page 11)

world are clearly seen, being understood by the things that are made, even His eternal power and headship; so that they are without excuse: because that when they knew Yahweh, they glorified Him not as Elohim, neither were thankful; but became vain in their imaginations, and their foolish heart was darkened. Professing themselves to be wise, they became fools, and changed the glory of the uncorruptible Elohim into an image made like to corruptible man, and to birds, and four-footed beast, and creeping things. Wherefore Yahweh also gave them up to uncleanness through the lust of their own hearts, to dishonour their own bodies between themselves: who changed the truth of Yahweh into a lie, and worshipped and served the creature (creation) more than

the Creator, Who is blessed for ever. Amen," Ro. 1:18-25.

The theory of Evolution actually proves that Yahweh's word is true. Since man corrupted the image of his Creator not only into the corruptible image of man, but also the world's creatures that are lower than man, the Creator has given him over to a mind that corrupts his own image and background to that of the animals.

These men school themselves intensely in the educational system of this world and profess themselves to be the wise all the while looking down upon the creationists (who may not be as highly educated, but do confess and believe in the Creator) with contempt and scorn should that person question their findings, theories, postulations, etc.

Evolution is worshipping and

serving the creation as its own creator. Oh, even some of the scientists and evolutionists say that they believe in God, but their god has to fit into their own parameters. JK even admits that he is searching into the physical creation in order to find a "window" to God. Even though the creation is a witness to the powerful creative acts of Yahweh, JK and his other scientific colleagues will deny that power and feverishly search and search into the far reaches of outer space and the inner depths of the Earth, but he will never find that window, until he repents, confesses that he is and has been in error, and turns to the Creator's own word, embracing them with all of his heart.

Let us pray that these misguided souls will soon see the true light.

WE HAVE LOST A SOLDIER AND FELLOW LABORER!

In Loving Memory

Elder Frank Brown

June 27, 1927 May 17, 2013

Sadly, we must report that Elder Frank Brown has passed on. He suffered from a heart attack on the 13th of May, and died from complications on the 17th.

Services were conducted by Elder Jerry Healan on the 20th of May at the West Zion Methodist Church.

Elder Brown served in the Army in World War II. He married his wife Josey at the same church in 1948.

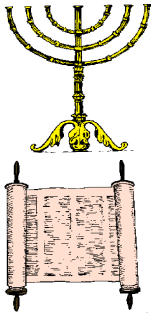

He was ordained as an elder by Brad Kisse (date not known). He was involved in publishing the "Search The Scriptures Newsletter" for about 18 years.

Last year, he turned the publishing of that newsletter over to Elder Healan. We have certainly heard of the many good things and impact that Elder Brown has had on many people's lives down through the years. There were so many positive testimonies

given at his funeral. One of the focuses of the funeral message was Dan. 12:3, "And they that be wise shall shine as the brightness of the firmament; and they that turn many to righteousness as the stars for ever and ever." This was certainly part of Elder Brown's work and legacy.

He is survived by His wife Josey, two daughters Margie White, and Terri Dean, eight grandchildren, and fourteen great grandchildren.

Two weeks before he died, he spoke at the same church, revealing Yahweh's name and saying that so much of his life had revolved around that church. He supposed that what had begun there would also be finished there. He pointed at the graveyard across the street saying he was sure that he would be carried there for his final resting place. Such is the case.
